UTrackIT

GPS Tracking

GPS is everywhere, allowing you to track assets, vehicles and people in real time and anywhere in the world. However, choosing the right tracking provider can be challenging. With UTrackIT, you choose the vehicle, portable, or personal tracking devices, and manage it all from a Web-based, real-time tracking program. Through a simple Internet connection, UTrackIT gives you the ability to quickly find, track and manage all of your assets.

Access Information from Anywhere

UTrackIT provides "Web-based" access, meaning that any Internet-enabled device – a laptop, desktop or a "web-enabled" smart phone – can access your assets' location data. Save data for later review. Download and analyze using existing reporting tools for asset location and detailed information.

Simple and Cost-Effective

UTrackIT provides more value and functionality than other standard GPS devices.

- UtrackIT is an always-on, real-time tracking solution
- UTrackIT maintains internet-based servers for all its clients
- Tracking at a fixed cost
- Movement alarm by SMS, specialized reporting, geo-fencing, tamper alerts, and more
    - Value-added services designed to your specific requirements are available on request
- Alerts to notify of any problems with tracking
- Locally designed, manufactured & supported, with local training and local service.
    - UTrackIT products are made and personalised for your conditions, and supported by people who can understand your expectations.

UTrackIT
GPS Tracking

Fully Supported

UTrackIT carries a two-year warranty against manufacture-related failure, and we provide a wide range of support, customization and user-focused training to make sure the product is working as it should.

How It Works

1 **Register** at http://www.UTrackIT.net. Select "First-Time Login", enter your Serial Number, along with your Name (or company name) and email address to create a unique login

2 **Login** to http://www.UTrackIT.net. The Map shows the current locations of all of your assets.

3 **Click** on 'AUTO' Refresh and the location updates automatically, maintaining the map of the latest locations of your assets.

4 **Personalize** the individual device 'BALLOON'. Right-Click the Balloon to access the Edit Device Information tool and update your asset information; change the name (and more) to be meaningful to you.

5 **Wind back Time** to review where an asset was at a specific time in the past. Historical movements are easily accessed by selecting a date and time range, and clicking 'FETCH'.

Get Tracking

Get started managing and controlling all of your assets. Visit www.utrackit.net for additional information.
